## Model 2890 Printer/Applicator Bag Labeler

Labeling Systems Inc. (LSI) recently supplied a print/apply labeler to a major food manufacturer. The machine utilized a customer specified Zebra Model 220XI II printer.

The labeler is portable and allows for it to be rolled up to any new or existing production line. A specially designed applicator handles multiple label sizes and conforms to the variances of the product surface area through a unique secondary wipe that minimizes wear.
