## Model 4570 Semi-Automatic Labeler

Labeling Systems Inc. (LSI) introduces this portable semi-automatic pressure sensitive labeler. The small footprint of the machine (3' x 3') allows for easy movement into tight production spaces.

The labeling head is mounted to a rigid frame assembly and incorporates a fine adjustment three axis mounting system. The combination of these designs along with a precision air cylinder tamp label applicator gives a repeatable accuracy of  $\pm 1/32"$ . The machine can also be equipped with a hot stamp imprinter for date or batch coding.
