Press Release

Wine Bottle Labeler

Labeling Systems Inc. (LSI) recently supplied the Model 9900 front/back and neck labeler to a large winery. The four headed stepper motor machine is capable of speeds up to 200 bpm. It included such features as a 16" roll capacity, fully integrated product handling, and customized controls as specified by the customer. An optional bottle orientation station was provided to provide for an over labeling capability.
